Response to Amendment

This is in response to an amendment file on September 9th, 2002 for letter for patent filed on April 4th, 2000 in which claims 1-67 were presented for examination. In the amendment, claims 1, 19, 22, 31, 49 and 50 have been amended. Claims 1-67 remain pending in the letter.

Response to Arguments

1. Applicant's arguments with respect to claims 1-67 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-67 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamamoto (U.S. Patent No. 6,078,663) in view of Council (U.S. Patent No. 6,192,114).

4. As per claims 1, Yamamoto teaches an address system comprising means for monitoring information (*information providing center, 40*) sent and asynchronously received to a fee address (*communication terminal, 60*) means for determining a fee (*calculating amount*) for the information, wherein the fee is based upon a preferences record defined by a mail recipient (*see*

Art Unit: 3621

abstract, fig 4 and 7, column 11 lines 45-64, 12 lines 35-59). Yamamoto fails to teach and inventive concept of a means for collecting the fee into a first account, means for forwarding the information to a private address; and means for transferring the collected fees to a second account. However, Council teaches an inventive concept of a means for collecting the fee into a first account, means for forwarding the information to a private address; and means for transferring the collected fees to a second account (*see abstract, figs 1 and 2, column 4 lines 8-55*). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify Yamamoto's inventive concept to include Council's inventive concept of a means for collecting the fee into a first account, means for forwarding the information to a private address; and means for transferring the collected fees to a second account because this would have ensure that user/customer receive quality of information for the fee paid.

5. As per claim 2, Yamamoto teaches an address system wherein the second account belongs to a third party (*see abstract, fig 4 and 7, column 11 lines 45-64, 12 lines 35-59*)

6. As per claim 3, Yamamoto teaches an address system wherein the address is an electronic mail address (*see abstract, fig 4 and 7, column 11 lines 45-64, 12 lines 35-59*).

7. As per claims 4-10, 15-18, Yamamoto teaches an address system wherein the fees are escalating based upon number of usages, and conditional, a combination of fixed, variable and conditional for different senders, is waived for a sender, is based upon the urgency of the information, are selected from the group consisting of fixed, variable or conditional, and based

Art Unit: 3621

on the size of the information based on word count, number of bits, and also fee varies for different sender and wherein the mail recipient elects to impose a fee (*see abstract, fig 4 and 7, column 11 lines 45-64, 12 lines 35-59*).

8. As per claims 11-14, Yamamoto teaches an address system wherein third party is a charity organization, a company, an individual, a firm (*see abstract, fig 4 and 7, column 11 lines 45-64, 12 lines 35-59*).

9. As per claims 19-67, they disclose the same inventive concept as claims 1-14. Therefore, they are rejected under the same rationale.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

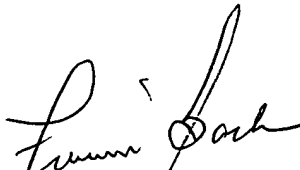

Art Unit: 3621

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
